SILESIA AUTOMOTIVE & ADVANCED MANUFACTURING THE CLUSTER MEMBERS' CATALOGUE

KEY
NATIONAL
CLUSTER

EDITION 2022

Janusz Michatek, PhD
KSSE President, Chairman of the Board

"Katowice Special Economic Zone for years has been the driving force in the automotive industry. Companies like Opel Manufacturing and Fiat Chrysler Automobiles, operating today under the Stellantis brand, chose this location for their car factories, same as several dozen manufacturers of components for the automotive industry chose this place for their investments. It is here, in Silesia, that Poland's first electric car, called IZERA, will also be produced. That's why, for 11 years now, the Katowice Special Economic Zone has been successively developing our flagship automotive cluster - Silesia Automotive & Advanced Manufacturing (SA&AM). Today, the SA&AM associates more than 180 entities companies and belongs to the prestigious group of Key National Clusters and contributes significantly to the development and strengthening of the automotive sector in our region."

Łukasz Górecki
Director of SA&AM Cluster

"Today the SA&AM Cluster represents a strong cooperation platform for the automotive sector, new technology suppliers and the local knowledge potential represented by research and scientific institutes. We are the largest automotive cluster in Poland, an active partner in international projects, and we have been continuously striving for excellence. Entrepreneurs and institutions operating in the Cluster, through sharing their experiences, good practices, joint activities, build relationships for future projects and upgrade competencies of their organisations to be more competitive and resilient to change. In this catalogue, we are pleased to introduce you to the SA&AM Cluster community, which includes automotive sector enterprises, suppliers and integrators of advanced technologies research, development and business support organizations. I hope that this catalogue, which introduces our participants, will encourage you to join the SA&AM Cluster."

More than
120
component and parts
manufacturers

More than
40
Suppliers of advanced industrial
technologies

WHAT IS SA&AM CLUSTER?

The Silesia Automotive & Advanced Manufacturing (SA&AM) cluster is an initiative for the development of the automotive sector in the Silesia region and in the neighbouring provinces.

SA&AM Cluster, coordinated by the Katowice SSE - the best Special Economic Zone in Europe, supports, through its activities, the development of the skills of companies and their employees and creates favourable conditions for the development and establishment of new automotive investments.

The SA&AM Cluster organises 30 thematic workshops per year, co-facilitates more than 20 industry events with partners and runs several dedicated projects to support the industrial transformation of companies and the development of human competences. We invite the following entities to become members of the SA&AM Cluster:

**automotive sector
manufacturers**

**high-tech
providers and
integrators**

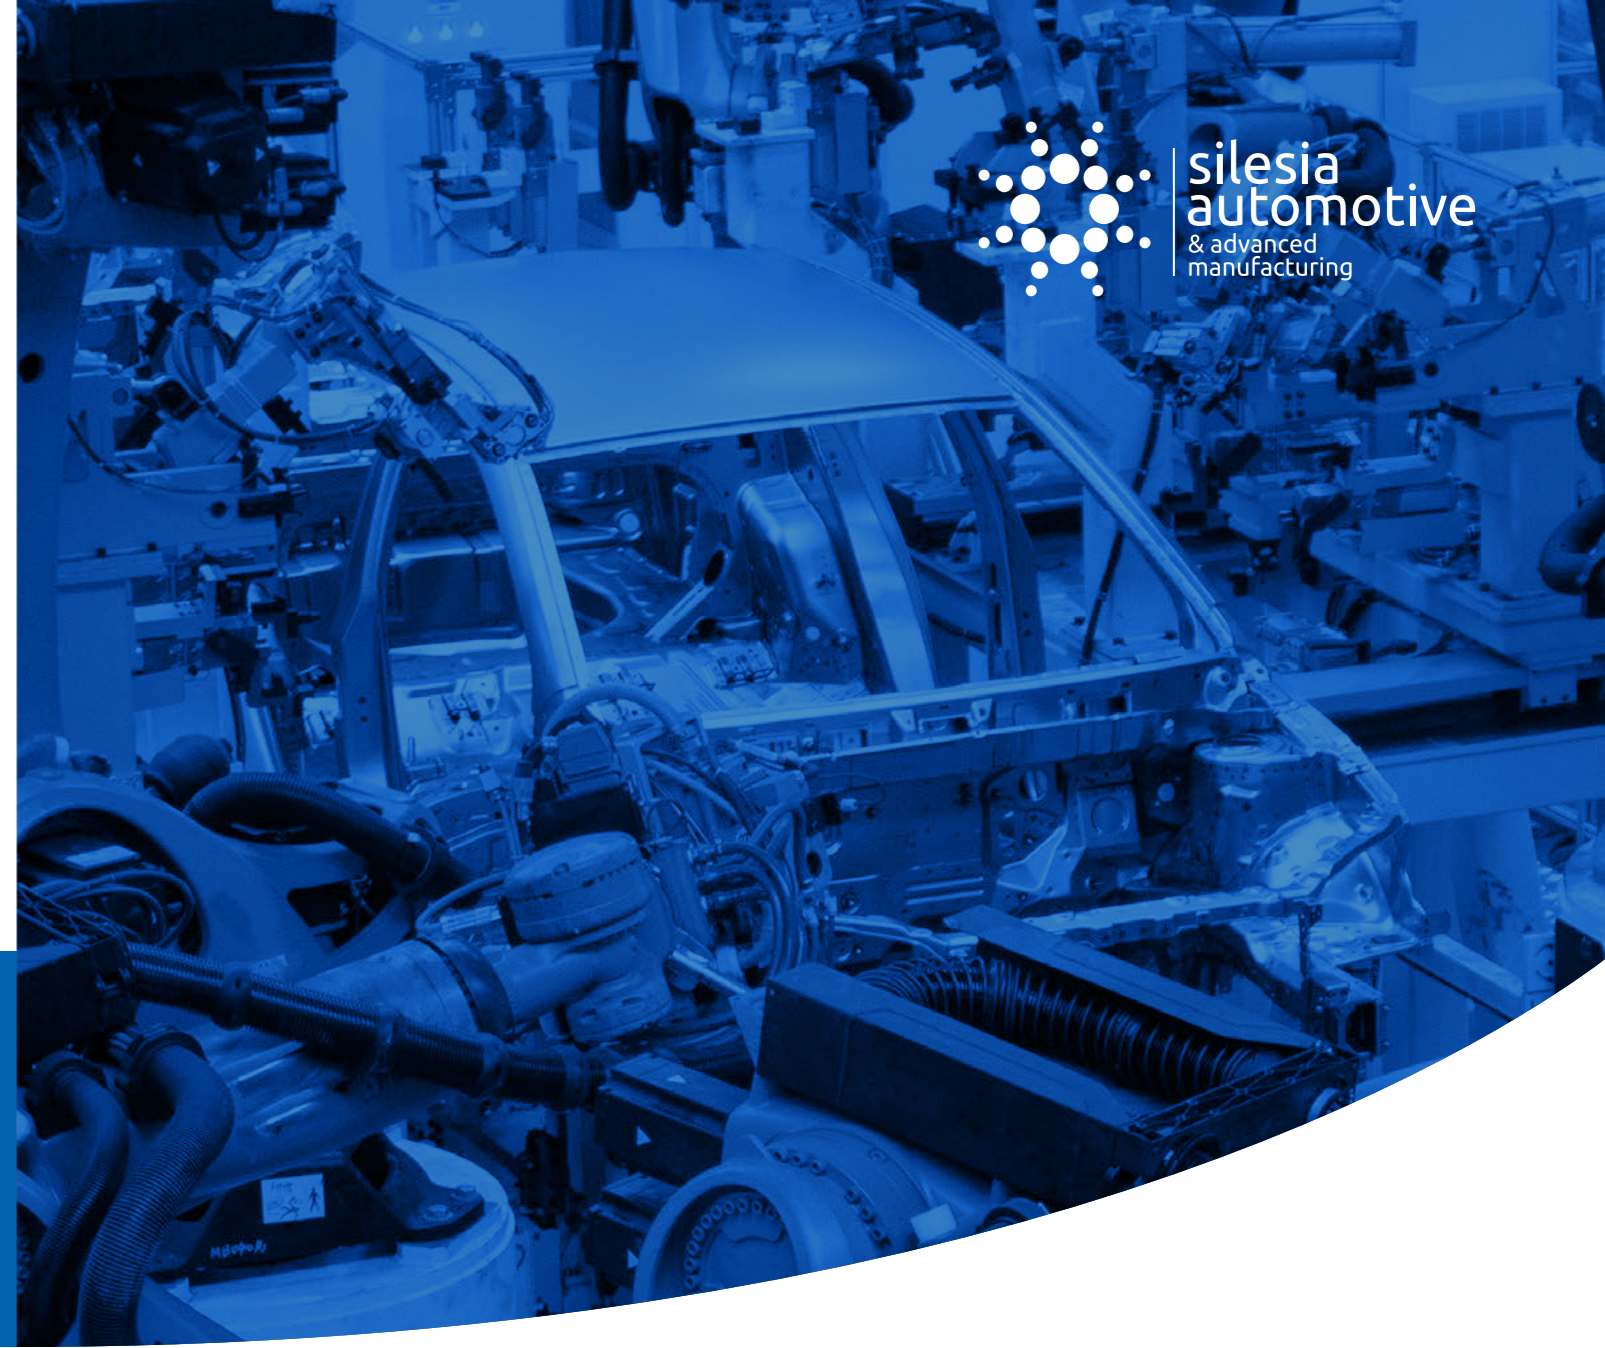

**business support
organizations**

**research
institutes,
scientific institutes**

universities

MISSION STATEMENT

The Cluster aims at building a strong platform for cooperation between businesses, educational and scientific institutions. We believe that cooperation within the SA&AM Cluster will boost the development of the automotive sector through:

- faster verification of external signals,
- a balanced, multi-partner assessment of the market developments,
- operational mobility in relation to specific problems within the sectoral thematic groups,
- access to jointly developed solutions,
- participation in development projects.

ELECTROMOBILITY POLAND SA

ElectroMobility Poland is leading a project to create and develop "Izera", the Polish electric car brand. The project involves the technical development of a model range of attractively priced compact-class electric cars to be produced at a newly set up plant in Jaworzno. Distribution will be based on a modern sales network adapted to today's market and technological challenges. The foundation of the project's assumptions is based on changes in the automotive market driven by electromobility and on the potential of the Polish automotive industry, which includes parts and component manufacturers and scientific and research units. The development of Izera, thanks to the acquired technology, will support the development of Polish companies operating in the automotive sector.

THE ALL-IN-ONE PLATFORM FOR THE BEST
ROBOTIZATION OF YOUR FACTORY

www.dbr77.com

DBR77
ALL ROBOTS • ONE PLACE

DBR77 ROBOTICS SP. Z O.O

The DBR77 is the world's first platform to accelerate the robotisation of manufacturing plants. It combines industrial plants with Integrators under one roof. Both parties develop the optimum solution jointly. Provides tools for operational, financial and investment analysis. The DBR77 also enables the creation of a digital twin, i.e. a virtual replica of all production environment components supporting data management, visualisation, simulation and process optimisation.

EMT-SYSTEMS SP. Z O.O.

EMT-Systems Sp. z o.o. is the most comprehensive technical training facility in Poland.

- 16 years of experience
- 180 technical training courses
- 100 trainers
- Above 67 000 of certified trainees

EMT-Systems specialises in organising courses for Maintenance Services, including automation, mechanical, energy, engineering and construction departments. Training courses and sessions take place in specialised laboratories equipped with actual industrial machinery.

FESTO SP. Z O.O.

Festo has been supplying automation technology optimisation components and applications to the automotive sector and its suppliers for many years. We offer automation solutions to increase productivity and improve the energy efficiency of processes in areas such as:

- Press shops
- Welding shops
- Paint shops
- Final assembly
- Chassis/Motor
- Systems and solutions for Tier 1 supplier processes

CENTRUM MATERIAŁÓW POLIMEROWYCH I WĘGLOWYCH PAN

The Centre of Polymer and Carbon Materials PAN has been an Institute of the Polish Academy of Sciences since January 1, 2011. The Center was established on January 1, 2007 from the merger of the Center of Polymer Chemistry PAN in Zabrze and the Institut of Carbon Chemistry PAN in Gliwice – two centers of the Polish Academy of Sciences which, for many years, had been conducting systematic work on the production and properties of macromolecular polymer and carbon materials. Both centers started operating in 1954. That year, the first chemical facility of the Polish Academy of Sciences based in the Katowice Province was opened, in Gliwice. This was the Laboratory of Petroleum Chemistry.
